

BeiGene believes in the power of storytelling.

Each of us has our own unique lived experience and perspective that we can honor and learn from.

Our voices individualize us. Together, our diverse voices unite and empower us in the fight against cancer.

Your story is important to us. Cancer is personal and each journey is unique. At BeiGene, we want to hear directly from CLL, WM or Gastric cancer patients and caregivers about their experiences so we can learn and elevate our collective voices.

If you are a CLL, WM or Gastric cancer patient who would like to share your story with BeiGene, please contact BeiGene Patient Advocacy for more information: patientadvocacy@beigene.com
